Shipping Weather Forecast Areas

General Information

Tidal predictions for Milford Haven have been computed by the National Oceanography Centre: Copyright Reserved.

The time is mean time of the meridian of Greenwich. The heights are referred to the datum of the largest scale Admiralty chart of the Port and should be added to the depths given on the chart. The datum is 3.71 m. (12.17ft.) below Ordnance Datum for Mean Sea Level (Newlyn) or zero of the automatic tide gauge at the Port of Milford Haven Jetty.

The information published in this booklet is provided to assist shipping using the Haven, and while every endeavour is made to ensure that it is accurate, the Port of Milford Haven accepts no responsibility for any errors it may contain or for loss or damage of whatever description arising directly or indirectly from matter contained therein.

The rates covering Conservancy Charges, Mooring Charges and Pilotage Charges can be obtained from the Port of Milford Haven.

Milford Haven Port Control Concise Guide

Ship movements are coordinated by the Port of Milford Haven's Port Control based at Hubberston Point, Position Lat. 51° 42.5' N, Long. 05° 03'W (approx).

Call sign "Milford Haven Port Control" with a continuous listening watch kept on VHF channel 12, the port frequency, as well as channels 11, 14 and 16.

Pilot and Patrol Launches maintain a continuous listening watch on channels 12 and 11.

It is mandatory for all vessels over 20 metres in length operating in Milford Haven and the approaches to report to Port Control.

Vessels inward bound

Vessels must send ETA at least 12 hours in advance to Port Control with any subsequent amendments at least two hours before arrival.

When within one hour of St Ann's Head, vessels must contact Port Control on VHF channel 12 and must subsequently maintain watch on channel 12. Vessels with any damage, or suspected damage, must advise Port Control and obtain permission to enter.

Vessels towing

Vessels towing must provide a tow plan and obtain permission from Port Control to enter. Towage guidelines can be found at www.mhpa.co.uk/marine-services

Passage plans

Vessels of 50 metres or more in length wishing to enter, depart or navigate within the area of jurisdiction of the Port of Milford Haven shall prepare a passage plan and declare such to Port Control prior to each movement commencing.

Vessels underway within the Haven

Vessels underway within the Haven must maintain a continuous listening watch on VHF channel 12. Reporting vessels over 20 metres in length should report at the various reporting points across the Haven.

Vessels anchoring

Vessels brought up in an anchorage must report to Port Control and, whilst at anchor, must maintain a continuous listening watch on VHF channels 12 and 16. Vessels at anchor will not be permitted to take on bunkers or immobilise main engines without the permission of the Harbourmaster.

Vessels outward bound

Vessels must report to Port Control prior to getting underway from berth or anchorage and maintain a continuous listening watch on VHF channel 12 until clearing port limits.

Harbour surveillance radar

The Port of Milford Haven operates a VTS traffic organisation service which includes harbour surveillance radar covering Milford Haven up to the Cleddau Bridge and seaward approaches for ranges up to 6 miles.

Berthing channels

VHF channels 15 and 9 have been allocated for berthing and unberthing operations within the main body of the Haven for use by ships, tugs, mooring boats and jetties. The channel allocation is as follows: north shore primary 9, secondary 15, south shore primary 15, secondary 9.

Exclusion zones

Any information regarding the introduction and enforcement of exclusion zones will be duly notified through Notice to Mariners and on our website www.mhpa.co.uk/notice-to-mariners

All Waterway users must follow these rules:

Milford Haven Port Authority Selected Bye-laws B/L20 Vessels to be Navigated with Care:

A vessel shall not be navigated or manoeuvred within the Haven in such a manner or at such speed as will or may:

- Cause damage to any lock gate, sea wall, jetty or other property within the Haven
- Cause damage, inconvenience or interruption to dredgers or other craft working within the Haven
- Cause damage, danger or inconvenience to other users of the Haven

B/L22 As to Fairway:

No vessel (whether sailing or power-driven) which is not confined to a channel by a reason of its draught, shall make use of that channel in such a way as to cause obstruction to any other vessel (whether sailing or power driven) which is confined to that channel by reason of its draught.

B/L24 Recognised Landing Place not to be Obstructed:

A master shall not place his vessel or allow it to be in such a situation as to obstruct or interfere with the access to any recognised landing place in the Haven.

B/L27 Unauthorised Vessels not to Approach Petroleum Berth:

Except with the permission of the Harbourmaster no vessel other than a petroleum ship, a vessel engaged in the mooring, unmooring and berthing operations of a petroleum ship or a vessel engaged in supplying or servicing a petroleum ship shall enter or navigate within 100 metres of a petroleum berth or a petroleum ship moored thereto.

B/L29 Water-skiing and Aqua-planing

A person shall not without the permission of the Harbourmaster engage or take part in water-skiing or aqua-planing, para-kiting or any similar airborne or waterborne activities in the Haven except in such areas as the Harbourmaster may designate and in accordance with such reasonable conditions as he may impose.

B/L30 Navigating Whilst Drunk

A person shall not navigate any vessel within the Haven whilst under the influence of drink or drugs to such an extent as to be incapable of taking proper control of the vessel.

B/L56 Acts Affecting Safety of Navigation

A person shall not do any act or thing injuriously affecting the safety of navigation within the Haven.

Full details of the Milford Haven Bye-laws 1984 are available at www.mhpa.co.uk

Selected International Regulations for Preventing Collision at Sea 1972 (with 1995 amendments)

Rule 5 Every vessel shall at all times maintain proper lookout by sight and hearing as well as by all available means appropriate to the prevailing circumstances and conditions so as to make a full appraisal of the situation and or risk of collision.

Rule 6 Every vessel shall at all times proceed at a safe speed so that she can take proper and effective action to avoid a collision and be stopped within a distance appropriate to the prevailing conditions.

Rule 9(b) A vessel of less than 20m in length or a sailing vessel shall not impede the passage of a vessel which can safely navigate only within a narrow channel or fairway.

Rule 13 Any vessel overtaking any other shall keep out of the way of the vessel being overtaken.

Rule 14(a) When two power-driven vessels are meeting on reciprocal courses so as to involve risk of collision each shall alter her course to starboard so that each shall pass on the port side of each other.

Rule 18(a) A power-driven vessel underway shall keep out of the way of:
iv) a sailing vessel.

Rule 18(a)(b) A vessel underway shall keep out of the way of:
i) a vessel not under command
ii) a vessel restricted in her ability to manoeuvre
iii) a vessel engaged in fishing

Beaufort Wind Scale

Force	Wind Speed (Knots)	Description	Sea
0	Less than 1	Calm	Sea like a mirror
1	1-3	Light Air	Ripples without foam crests
2	4-6	Light Breeze	Small wavelets. Crests do not break
3	7-10	Gentle Breeze	Large wavelets. Crests begin to break
4	11-16	Moderate Breeze	Small waves. Fairly frequent white horses
5	17-21	Fresh Breeze	Moderate waves. Many white horses
6	22-27	Strong Breeze	Large waves. White foam crests everywhere.
7	28-33	Near Gale	Sea heaps up. White foam begins to be blown in streaks.
8	34-40	Gale	Moderately high waves of greater length. Foam blown in well-marked streaks.
9	41-47	Strong Gale	High waves. Dense streaks of foam. Crests begin to roll over. Spray may affect visibility.
10	48-55	Storm	Very high waves with long overhanging crests. Great patches of foam in dense white streaks. Sea surface white. Tumbling of sea becomes heavy. Visibility affected.
11	56-63	Violent Storm	Exceptionally high waves. Small and medium sized ships may be lost to view. Sea completely covered with foam. Visibility affected.
12	More than 64	Hurricane	Sea completely white with driving spray. Air filled with foam and spray. Visibility very seriously affected.

Large tankers may not see you, and they have less manoeuvrability. Stay clear to stay safe.

JUNE

[illegible]

**Kill cords save lives when used correctly.
Check to see you are using yours properly.**

	22:09	6.74	22.1	5.51	18.1						

If you are new to boating, lessons are a great way to ensure you act responsibly and stay safe.

Up-river has some beautiful scenery but remember to keep to Dead Slow Minimum Wake.

Tidal Reduction Tables

Explanation

The following tables aim to provide a simple method of determining the approximate height of tide at times not predicted in the main tables.

To use the table:

- (1) Find out whether the required tide is on the ebb or flood, and also the nearest high water.
- (2) Take out the 'Range of Tide' from the 'ebb' or 'flood' column of the tables for the nearest high water.
- (3) Enter the reduction table with the time before or after high water on top and the 'Range' at the side and take out the height in feet or metres above low water from this table.
- (4) To this result add the height of nearest low water.
- (5) The final result will be the tidal height referred to port low water datum for the given time.

CAUTION: - The predictions by these tables must be taken as approximate on account of variations in level due to meteorological conditions. It should be noted that when the local barometer pressure is over 30.00", and particularly if this is accompanied by N to NE winds of force 5 or upwards, tidal levels may be considerably lowered.

The changes in sea level referred to are usually slow; thus in the Haven at the beginning of a period of high barometer and out blowing winds, sea level may drop, and supposing the barometer and wind remain constant, continue to drop for several days until a height, depending on the height of the barometer and force of wind, is reached. Sea level will probably then remain constant until the barometer begins to drop and the wind to decrease, when a gradual rise to normal begins, but may not be completed until some time after weather conditions have become normal.

Height in feet to be added to low Water to obtain height at intervening intervals (in hours)

Range of Tide In feet	BEFORE HIGH WATER
